【十天精品课堂系列】 主讲:李炎恢

08. 创建添加用户 UI

学习要点:

1.添加用户 UI

本节课我们来开始进入学习一下添加用户 UI 的设计方案;

一.添加用户 UI

- 1. 本节课,我要做一下添加用户的界面,尽可能将前端代码做到极简;
- 2. 首先,列表页的添加用户改成超链接形式,方便点击跳转;

```
<a href="{:url('/user/create')}" class="btn btn-success">添加用户</a>
```

3. 然后创建 create 模版,设计添加用户 UI,代码略多,具体如下,;

```
<!--添加用户-->
<form action="{:url('/user')}" method="post">
   <fieldset class="w-75">
       <div class="form-group row">
           <label for="username" class="col-2 col-form-label">用户名</label>
           <div class="col-8">
              <input type="text" id="username" name="username"</pre>
class="form-control" placeholder="请输入用户名">
           </div>
       </div>
       <div class="form-group row">
           <label for="password" class="col-2 col-form-label">密码</label>
           <div class="col-8">
              <input type="password" id="password" name="password"</pre>
class="form-control" placeholder="请输入密码">
           </div>
       </div>
       <div class="form-group row">
           <label for="passwordnot" class="col-2 col-form-label">密码确认
</label>
           <div class="col-8">
              <input type="password" id="passwordnot" name="passwordnot"</pre>
class="form-control" placeholder="请输入密码确认">
           </div>
       </div>
       <div class="form-group row">
           <label class="col-2">性别</label>
           <div class="col-8">
              <label for="man" class="col-form-label-sm">
                  <input type="radio" id="man" name="gender" value="男"</pre>
```

```
checked>
                  男
              </label>
              <label for="woman" class="col-form-label-sm">
                  <input type="radio" id="woman" name="gender" value="女">
                  女
              </label>
          </div>
       </div>
       <div class="form-group row">
          <label for="email" class="col-2 col-form-label">电子邮箱</label>
          <div class="col-8">
              <input type="text" id="email" name="email" class="form-control"</pre>
placeholder="请输入电子邮箱">
          </div>
       </div>
       <div class="form-group row">
          <label class="col-2"></label>
           <div class="col-6">
              <label for="agree">
                  <input type="checkbox" id="agree" name="agree">
                  <span class="col-form-label-sm">我已同意看视频不喷老师的协议
~</span>
              </label>
          </div>
           <div class="col-2 text-right">
              <a href="{:url('/user')}" class="col-form-label-sm">返回列表
</a>
          </div>
       </div>
       <div class="form-group row">
          <label class="col-2"></label>
           <div class="col-8">
              <button class="btn btn-success w-100">添加用户</button>
          </div>
       </div>
   </fieldset>
</form>
```
